

# Steps we are taking to help keep our community healthy

In an effort to mitigate the spread of illnesses, including Coronavirus, in our communities, Challenger Homes is being more diligent than ever in the cleanliness and maintenance of our sales offices, model homes, and offices, including:

**Asking Challenger associates who are exhibiting any signs of illness to stay home until they are well.**

---

**Cleaning sales center and model home surfaces more diligently and frequently than ever, using disinfectant products approved by the US EPA to be effective against Coronavirus (COVID-19).**

---

**Kindly asking our community members to avoid visiting sales centers, model homes, and public areas in general if they are feeling unwell.**

---

**Employees and sales associates are practicing safe social distancing techniques provided by the CDC.**
